

Epidural Steerable Multifunctional Electrocatheter for Radiofrequency Treatment

Pulsed radiofrequency
Stimulation - Infusion

VOYAGER

Ref	Length	Diameter Ø	Connector	Electrode
VA3540-BC	35 cm	5 Fr	Cosman	Bipolar
VA3540-BB	35 cm	5 Fr	Baylis	Bipolar
VA3540-BN	35 cm	5 Fr	Neurotherm	Bipolar
VA3540-BO	35 cm	5 Fr	OWL (Diros Technology)	Bipolar
VA3540-BT	35 cm	5 Fr	TherMedico	Bipolar

The Monopolar version of the catheter is available on request, only.

GET

Ref	Description
IA0915	GET - Sacral Epidural Introducer 91mm x 13G

"GET" INTRODUCER
- Sacral access
- Radiopaque, with atraumatic tip

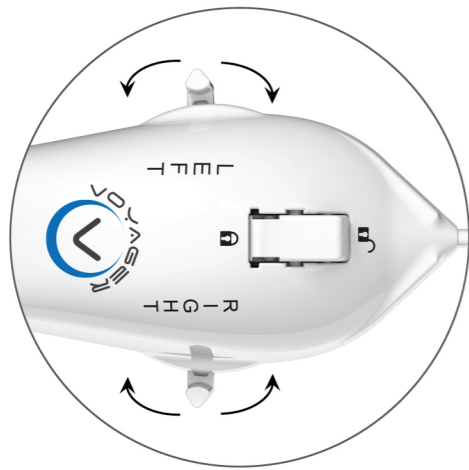

Via Martiri di Cefalonia, 28 - 63822 Porto San Giorgio (FM) - Italy

Voyager is a Mono/Bipolar Multifunctional Epidural Electrode with steerable Active Tip. The electrocatheter is designed for chronic, neuropathic and painful pathologies of the epidural space. Adhesiolysis/Epidurolysis or lysis of the adhesions.
The electrocatheter is connected to a Radiofrequency Generator in stimulation and PRF (Pulsed radiofrequency) mode.

Both lateral and from the tip infusion of drugs on the target.

- Bipolar electric field generated by two electrodes for a more selective and accurate Electric Stimulation and Radiofrequency.
- Thermocouple Sensor.

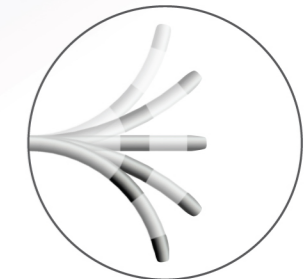

MULTIFUNCTIONAL

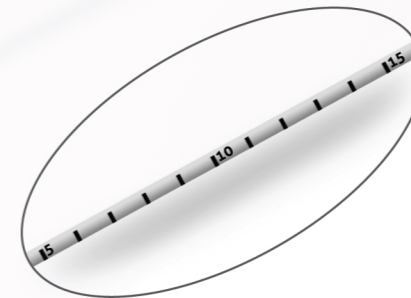

- Electric Stimulation of the nervous, spinal and dorsal structures on several levels.
- Pulsed Radiofrequency Treatment (PFR) on the nervous, spinal and dorsal roots, also on several levels.
- Pharmacological treatments by selective drugs infusion on the target. Double pharmacological and/or mechanic action.

HANDLE

- Ergonomic.
- Tip orientation mechanism to facilitate the navigation and the advancement of the electrocatheter into the epidural space.
- Block system of the tip with a button that guarantees the placement of the electrocatheter tip once it is positioned on the target to be treated.

Radiopaque, flexible, soft, atraumatic and steerable tip.

Radiopaque and flexible electrocatheter body. Markers each centimetre.

CONNECTOR

Dedicated connection for each different RF Generator on the market.

INFUSION WAY

- Dedicated lumen for drugs infusion.
- Removable stylet.

Infusion way with specific extension cable.
